SIG SAUER®

when it counts™

COMPANY

Since 2000, SIG SAUER GmbH & Co. KG belongs to L&O Holding, who also holds sister companies, including the US subsidiary SIG SAUER Inc. based in Exeter, New Hampshire and the Swiss subsidiary SWISS ARMS located in Neuhausen.

Close to 200 employees produce and market the entire range of handguns and long firearms at the company location in Eckernförde. We supply both the civil market, which includes sportsmen, collectors and hunters, and the law enforcement and military segment. Our success is built on understanding the desires and demands of our customers and implementing them accordingly. In the process, we have developed an extensive firearm portfolio ranging from modern service pistols to semi-automatic and bolt action rifles through to modular high-performance target pistols which ensure the global success of our company.

The quality and precision of SIG SAUER GmbH & Co. KG products place the company amongst the world market leaders in firearms. In addition, the SIG SAUER quality management system was reviewed by the external Lloyds Register Quality Assurance in January 2006 and certified according to the most recent DIN EN ISO9001:2000. SIG SAUER GmbH & Co. KG thereby meets the high ISO 9001 standard. This distinction for the SIG SAUER brand also applies to sales & marketing, product development, production, and service.

Process and customer-oriented action, a focus on the needs of the market, the

Loch and Andreas Köhler, members of the International Practical Shooting Confederation (IPSC) team, work closely with SIG SAUER engineers in the design and development of new competition models. These athletes are renowned for both their individual and team championship titles, and rank among the world's top PPC marksmen. They are multiple world, German, and Swedish champions in a variety of PPC1500 categories.

SIG SAUER is dedicated to providing shooting enthusiasts like you with only the most advanced, accurate, and reliable firearms possible. Our designs, manufacturing processes, material specifications, and patents are unique in the firearms industry. The result of this ongoing commitment to engineered excellence and superiority, combined with over 250 years of experience, is an extensive line of the highest quality firearms in the world.

SIG SAUER firearms and accessories are available in over 100 countries, with a significant presence in the United States through our partner company,
SIG SAUER, Inc. of Exeter, New Hampshire.

X-FIVE SERIES

P226 X-FIVE

FEATURES

- Extended lock
- Extended grip
- A manual safety on both sides

P226 X-FIVE

Who expects only maximum performance of himself, expects the same of the tools he uses. The P226 X-FIVE meets the extremely high expectations of ambitious shooters to perfection.

P226 X-FIVE AL SO

High performance, precision, and safety are the characteristic features of the P226 X-FIVE AL SO by avoiding the use of steel results in a more attractive price. The attractive two-tone look of this dynamic lightweight gives the AL version an especially sporty appearance. The accessory rail expands its application range.

P226 X-FIVE ALLROUND

We put the knowledge and experience of our IPSC team to use in the development of innovative sporting guns like the P226 X-FIVE all around. With this gun, sport shooters worldwide choose an extensively equipped, high-quality tool based on a modular, individual system which allows for shooting a wide variety of disciplines.

P226 X-FIVE SO

The service version of the P226 X-Five offers superior features designed to meet the heavy demands of service life. Especially developed, designed, and manufactured for the Special Forces and SWAT teams, they are among the highest-quality service pistols produced today. The X-Five SO is permitted for all service pistol competitions in Germany (BDS, BDMP, VdRBW).

CONVERSION KITS

CONVERSION KITS OFFER A LARGE RANGE OF OPPORTUNITIES:

To shoot with optimal precision, the competitive shooter needs a combination of ergonomics, balance, and trigger response. The SIG SAUER X-FIVE/X-SIX pistols can be finetuned to your individual requirements, both on the guns themselves and with a variety of SIG SAUER accessories.

YOUR KEY TO SUCCESS

To shoot with optimal precision, the competitive shooter needs a combination of ergonomics, balance, and trigger response. The SIG SAUER X-FIVE/X-SIX pistols can be finetuned to your individual requirements, both on the guns themselves and with a variety of SIG SAUER accessories.

SIGHT MOUNTS

SIG SAUER sight mounts provide consistent, accurate, custom optical sight placement.

MODULARITY

Integral accessory rails make customizing your pistol as simple as possible.

ERGONOMICS

A beavertail frame design gives the competitive shooter ideal hand fit, for more control and better resulting performance. The contoured grip fits perfectly in the hand. Optimally positioned and designed controls provide safe and reliable handling.

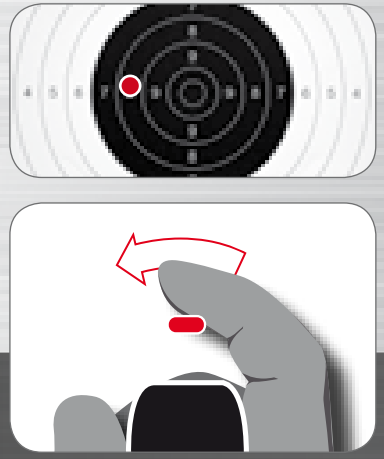
BALANCE

Balance is critical in sport and target shooting. Additional weights are available and easily mounted to any of the X SERIES frames for fine-tuning the balance and stability for the individual shooter.

THE SIG SAUER MATCH TRIGGER

With the unique SIG SAUER match trigger system, the three most important trigger settings can be individually adapted to your needs:

- **trigger distance (8 mm distance range)**
- **trigger weight (1 – 1.6 kp)**
- **trigger stop**

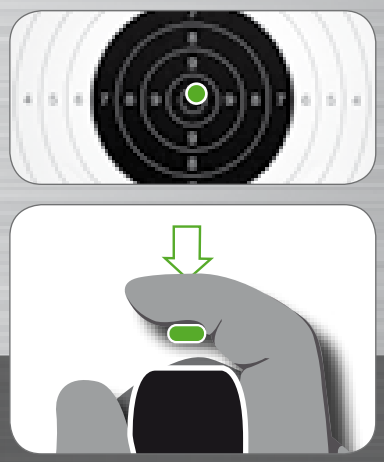


INCORRECT

With the trigger positioned too far forward, short reach to the face of the trigger results in shots pushed left for the right handed shooter.

SOLUTION

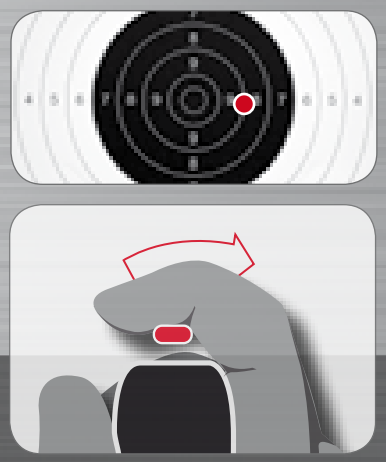
Adjust the trigger rearwards for optimal reach.



CORRECT

The fingertip of the index finger is positioned in the centre of the trigger.

TARGET-HIT POINT IS IN THE CENTRE.



INCORRECT

Placing the finger around the trigger too firmly leads to a rightward deviation of the target-hit point:

SOLUTION

Increase the trigger distance by adjusting it further forward.

P210 TARGET

FEATURES

1911

1911

The legendary 1911 design has been in use since the year 1911, when the US Army first embraced John. M. Browning's then revolutionary design. Enthusiasts, marksmen, and law enforcement and military professionals have continued to rely on this American original ever since.

Original design features that have stood the test of time include its original .45ACP ammunition, its unique magazine catch, the recognizable beavertail design, and its superior ergonomic grip angle. SIG SAUER pays tribute to the forerunner of all semi-automatic pistols with unmatched quality, reliability, and SIG SAUER design enhancements such as advanced materials and finishes, and a match grade trigger.

P250 SERIE

P250 SERIE

The P250 is the most innovative and versatile weapon from SIG SAUER. This modular service-pistol system allows for an immediate change in calibre and size, based on specific requirements. Three sizes and grip module confi gurations are available:

- P250 FULL SIZE
- P250 COMPACT
- P250 SUBCOMPACT

Three different grip sizes are available to fit any hand size on the Full Size and Compact models. A DAO trigger system ensures safe and confident handling.

Fire Control Assembly – the durable stainless steel heart of the P250 modular system. Built around a serialized modular frame and fire control assembly, the Fire Control Assembly fits into any of the P250 polymer grip modules. Barrel length and trigger size can also be easily interchanged.

FITTED TO THE TASK, AND THE SHOOTER

SIG SAUER engineers evaluated hand size data from more than 20,000 test subjects to develop the ideal combination of perfect ergonomics and greatest magazine capacity.

The result is a modular service-pistol system that allows virtually any shooter, left or right handed, with small or large hands, to fire safely and comfortably every time.

P250 COMPACT

ALSO AVAILABLE:

P250 SUBCOMPACT RAIL

P250 SUBCOMPACT

P250 DCc CERTIFIED

The SIG SAUER P250 DCc passed strict Ulm Certification guidelines from January 2008 for "pistols with a calibre of 9 mm x 19".

Ulm Certification from the German government is the toughest certification in the world (learn more at www.beschussamt-ulm.de). Three tested pistols fired 10,000 rounds each with only 6 malfunctions during the 30,000 round total. The P250 DCc also passed testing under harsh conditions of sand, mud, rain, and dust.

Proven reliability!
